3. Description of the complaint

Date of occurrence	2026-09-12
Quantity affected	1 carton (10 x 10 tablets)
Description	Tablets in this batch have a strong unusual odour and several show brownish discolouration on the film coat. One inpatient (female, 62 years) developed a rash and vomiting approximately two hours after the first dose from this carton. The patient required medical attention and was admitted for observation for 24 hours; she has since recovered. No death occurred. Treatment was switched to an alternative supplier.
Sample available	Yes – the remaining 92 tablets from the carton are quarantined and available on request.

Counterfeit suspected	No – product received from the hospital's contracted distributor with intact seals.

4. Declaration
