Supplier Quality Notification – API Complaint

Issued by: Nova Formulations Ltd., Incoming Quality Control, Birmingham, United Kingdom

Notification date	2026-09-10
Contact	Mark Ellison, QC Manager – mark.ellison@novaformulations.example.com, +44 121 496 0342
Supplier	Zenith Pharma Pvt. Ltd. (API division)
Material	Metformin Hydrochloride API (USP)
Batch number	MET-API-2026-044
Manufacturing date	2026-06-05
Retest / expiry date	2028-06-04
Quantity affected	2 drums of 25 kg (50 kg)

Observation

During incoming inspection on 9 September 2026, dark foreign particles were observed in two of the six drums received against purchase order NF-77812. Particles were visible to the naked eye on the surface of the white crystalline powder and were also retained on a 500 µm sieve. The remaining four drums appeared normal. Identity and assay of the affected drums were within specification; the complaint relates to visible particulate contamination only.

Impact

The affected drums have been placed on hold and have not been used in manufacturing. No finished product was produced from this material, and no patient exposure has occurred. Retained samples of the particles and of the powder from both drums are available and can be shipped to the supplier for investigation. We request a root-cause investigation, a statement on the other batches manufactured on the same line, and replacement material.

Mark Ellison – QC Manager, Nova Formulations Ltd.
